

JARLAM

FABRICATION CAPABILITIES

WHO WE ARE

Jarlam Australia is a mechanical engineering and fabrication company located in Bayswater Victoria, with over 1000m² of workshop facilities. Jarlam boasts a workforce of more than 30 full time team members, who have extensive experience supporting the food, pharmaceutical and packaging industries.

Jarlam offers a diverse array of services ranging from engineering, design and drafting to the fabrication of quality stainless steel products. In addition to workshop services we specialise in on-site equipment installations, asset relocations and all types of mechanical site works.

HOW WE WORK

We pride ourselves on having the strongest commitment to our clients needs. Understanding our client and what is important to the project, is key to achieving desired results.

Lead times - Our clients lead times are crucial.

Consistent quality - Our quality assurance processes ensure that all projects/products are delivered with the highest standard of quality.

Turn key projects - Jarlam is able to successfully deliver turn key projects utilising our extensive project management experience as well as our multi discipline approach. Clients will also have access to our huge supplier networks to ensure quality products at the best prices.

Client relations - Honesty, trust and communication has been at the forefront of developing long lasting relationships with our key clients.

“ The job was done on time and every member of the crew was attentive to safety requirements. I wouldn't hesitate to recommend them. ”

Great company to work with. Good quality build and design. Lots of technical experience especially in the food industry.

AREAS OF EXPERTISE

Stainless steel fabrication has been at the forefront of Jarlam's operations for over 15 years. Jarlam prides itself on providing quality design and fabrication to ensure client expectations are not only met, but exceeded. Areas of expertise are as per below:

Food industry: Our extensive experience in the food industry has allowed us to develop best practice design ideas, quality fabrication techniques, whilst at all times adhering to Australian Standard Codes.

Pharmaceutical: Ongoing collaboration with our pharmaceutical partners, has contributed to our extensive experience with both chemical and mechanical stainless steel finishing techniques.

Mechanical engineering: Jarlam offer a diverse range of mechanical and engineering design services that include, but are not limited to:

- Conceptual engineering
- Inventor and Autocad design software
- Compliance to Australian Standards
- Technical documentation
- Dynamic simulation and finite element analysis

FABRICATION

Utilising quality equipment and the highest of industry standards, Jarlam produce a diverse range of fabrication products:

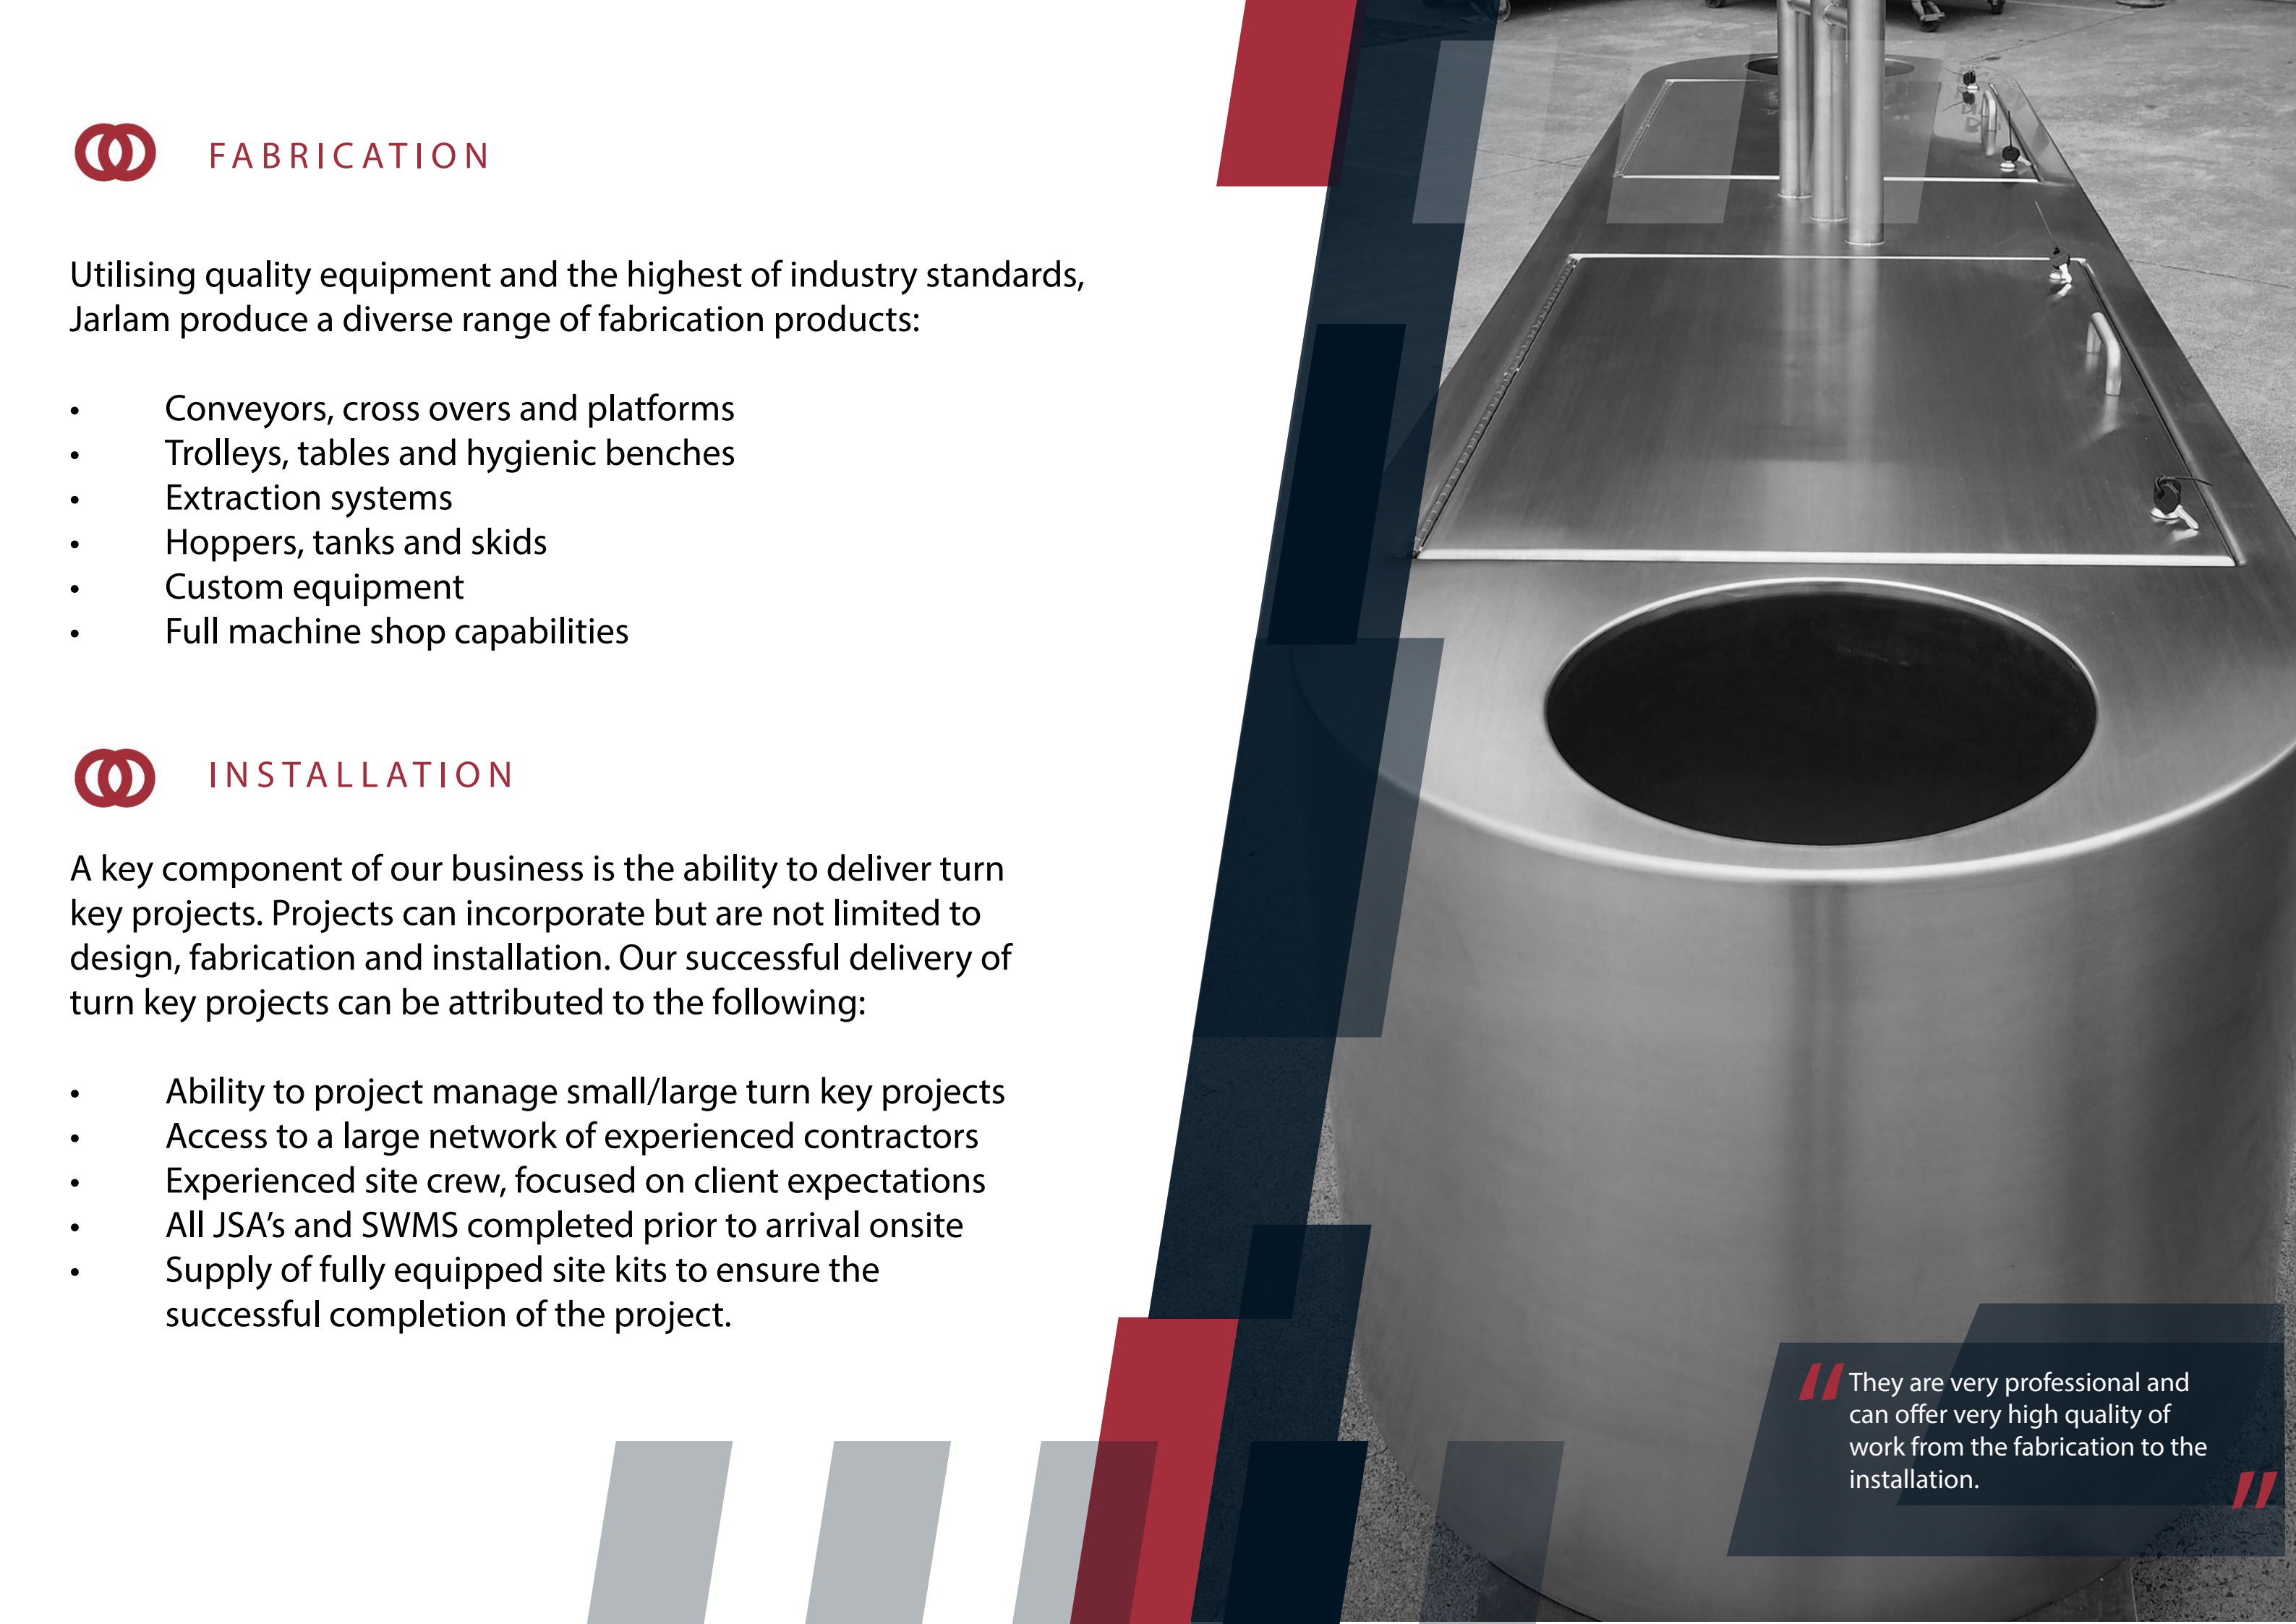

- Conveyors, cross overs and platforms
- Trolleys, tables and hygienic benches
- Extraction systems
- Hoppers, tanks and skids
- Custom equipment
- Full machine shop capabilities

INSTALLATION

A key component of our business is the ability to deliver turn key projects. Projects can incorporate but are not limited to design, fabrication and installation. Our successful delivery of turn key projects can be attributed to the following:

- Ability to project manage small/large turn key projects
- Access to a large network of experienced contractors
- Experienced site crew, focused on client expectations
- All JSA's and SWMS completed prior to arrival onsite
- Supply of fully equipped site kits to ensure the successful completion of the project.

“ They are very professional and can offer very high quality of work from the fabrication to the installation. ”

“ Jarlam were easy to work with, the job was done on time and every member of the crew was attentive to safety requirements. I wouldn't hesitate to recommend them. ”
